GMR 410 Publishes White Paper  
*Publication Educates Readers on ATM Crime and Mitigation Strategies*

**Heath, TX:** GMR 410, a wholly owned subsidiary of GMR Protection Resources has published a white paper on ATM crime. Written by Mary Gates, Vice President of Security, this publication provides readers a description of the different types of ATM related crime, along with regulations and tactics to mitigate incidents.

“Throughout my career in bank security,” says Gates, “I found state and local regulations, types of ATM vulnerabilities and mitigation techniques, to be ever evolving and scattered across a multitude of sources and sites. With this white paper, I aimed to summarize and consolidate information in plain language so security professionals and independent ATM operators can spend less time searching the internet and other resources and more time planning their asset protection strategy.”

This white paper will help personnel:

- Better understand the different types of ATM crime
- Make decisions to impact ATM related criminal activity
- Reduce liability

More from Gates: “Security decisions impact every aspect of your business. Becoming more informed, analyzing the security needs of your individual locations, categorizing locations based on their risk, implementing enhanced security strategies where appropriate, and working towards compliance with your ATM lighting program marry together to build a safety blueprint to help protect your customers, assets and brand reputation.”

You can download the white paper by going to <https://www.gmr410.com/articles-resources/>.

**About GMR:** Over the past three decades, GMR has become known as the "Industry Best Practice" for helping facilities document existing conditions, prepare for improvements, and minimize risk. We are a diverse supplier, woman-owned and operated firm, specializing in ATM lighting compliance surveys, custom facility inspections,

engineered lighting designs, program management, 3D laser scanning, and security consulting. Headquartered in the Dallas/Fort Worth Metroplex, we self-perform over 45,000 inspections and engineered solutions each year nationwide. Just as each client is unique, so are our methodologies and solutions.
